

EVALUATION OF INSTRUCTIONAL PROGRAMS

The purposes of evaluation of instruction will be:

1. To determine educational needs and provide information for planning.
2. To indicate instructional strengths and weaknesses.
3. To check on the suitability of programs in terms of community requirements.
4. To show the relationship between achievement and the system's stated goals.
5. To provide data for public information.

Instructional programs shall be directed by the Superintendent in cooperation with the local Accountability Committee and all school principals.

It shall be the responsibility of the Superintendent to report periodically to the School Board on the progress the district is making towards the attainment of its educational goals.
