

## ASSESSMENT

It is the policy of the Jackson School Board that the Superintendent will develop and manage an assessment program that provides an ongoing evaluation of the effectiveness of the curriculum on improving student performance.

The program must adhere to the process for selection, administration, and interpretation of assessment instruments specified below. This program will include both local and statewide assessment tools.

The program must be aligned with the goals of the district and be designed to assess each student's progress toward meeting the defined curriculum objectives.

Test results will be analyzed and used with other data for the following purposes:

- To identify individual student strengths and weaknesses in skill development;
- To diagnose strengths and weaknesses of groups;
- To individualize instruction;
- To report progress to parents;
- To select curriculum materials;
- To set the pace of instruction;
- To select methods of instruction;
- To counsel students;
- To help determine revisions needed in the curriculum.

### Selection

The selection process will include the professional staff in its efforts to investigate new assessment tools and evaluate existing ones.

Assessment instruments selected will provide an authentic assessment of student learning outcomes through multiple formative and summative assessment instruments including, but not limited to, teacher observation of project-based learning, including off-site learning projects; competency-based assessment; and teacher-designed quizzes and tests. Additional instruments may include written examinations, oral examinations, alternative questions, demonstrations, writing exercises, individual projects, group projects, performances, student portfolios, and samples of student's best works.

### Administration

The assessment program will include a schedule for administration to students, distributed to staff and the board before the start of each school year.

Each building principal will provide assurance that test procedures are followed at the school level including the distribution and collection of test materials, test security, use of test results and testing dates as well as other pertinent requirements.

Readiness assessment shall be administered to all children entering first grade.

Handicapped students must be provided the opportunity to participate in all student assessments. Any modifications in administration should be made and documented during the Individualized Education Program (IEP) review.

### Interpretation

The Superintendent or designee will ensure that data from the student assessment program is compiled, analyzed, summarized, and reported to the Board annually. The Superintendent or designee is responsible for the scores of individual students and they shall be made available only to appropriate personnel within the school in which the student is enrolled and to parent(s) or legal guardian(s) of each student as provided by law. Interpretation of test results shall be made available to parents and students.

The Board will provide funding for the student assessment program, including professional development for teachers in the use of tools to understand assessment results, to adjust instruction to meet personalized needs of students, and to monitor progress.

The Superintendent will provide an ongoing evaluation of the assessment program, and will provide regular reports to the Board showing the effectiveness of the curriculum on improving student performance.
