

INDOOR AIR QUALITY

In order to ensure that all school buildings have adequate indoor air quality, the Board directs the Superintendent or the Superintendent's designee to address methods of minimizing or eliminating emissions from buses, cars, delivery vehicles, and other motorized vehicles. The Superintendent/designee may delegate the implementation of these methods to building principals. The Board encourages the Superintendent/designee to utilize methods and recommendations established by various State agencies.

In addition to addressing methods eliminating emissions, building principals are directed to annually investigate, and report to the Superintendent/designee, air quality in their respective school buildings using a checklist provided by the New Hampshire Department of Education.

In support of this policy, the Superintendent is authorized to establish regulations and/or administrative rules necessary to implement anti-idling and clear air measures aimed at improving indoor air quality.
